REMARKS [redacted]

25X1

1. On 8 December 1950, the Aspern (49/X 49) airfield was occupied by 110 Le-2s, 10 single-engine biplanes, and one twin-engine semi-high-wing monoplane. (1)
2. A radio installation, consisting of four masts arranged in a square with a cabin in the center, was on the northeastern corner of the field. (2)
3. An ammunition dump was northeast of the field, beyond the railway bed. (3)
4. No changes or construction work were seen at the field, which was observed from various sides. (4)

- (1) The occupation has not changed as compared with previous observations. [redacted] and [redacted]
- (2) Two sets, possibly radar sets, were reported at the same location in April 1950. [redacted]. The clear description of this report indicates that the set is certainly a regular radio installation. The presumed radar sets have not been observed since.
- (3) This is reported for the first time.
- (4) The thorough observation was made because of previous information, according to which jet aircraft were allegedly stationed in the Vienna area, and preparations for the arrival of such planes were allegedly made.
